

Aluminum/Plywood Scaffold Decks

Product Selection Guide

Features

- Aluminum/plywood scaffold decks are lightweight.
- The decks are easy to handle, transport and store.
- Suitable for many uses: construction and maintenance platforms, as well as staging.
- Maintenance and replacement costs are extremely low. The rugged aluminum frame resists damage and plywood surfaces can be easily replaced.

Aluminum/Plywood Scaffold Decks

Length	Weight	Part Number
5'	22 lbs.	ADP19L5
6'	26 lbs.	ADP19L6
7'	28 lbs.	ADP19L7
8'	36 lbs.	ADP19L8
10'	47 lbs.	ADP19L10

Aluminum/Plywood Scaffold Decks

Benefits

- Only three lightweight decks are needed to fully cover a 5 ft. wide scaffold frame.
- Wood plank overhang is eliminated. This provides easier access to rolling tower platforms and flush decks on scaffold runs.
- The rigid decks hook onto the scaffold ledgers and help prevent the scaffold from racking, eliminating the need for horizontal diagonal bracing at the platform level.
- Hooks are provided with either a nail hole or latch mechanism to prevent wind uplift.

Wood plank overhang is eliminated for easier access

Availability

We have several types of aluminum/plywood decks in our inventory. Contact your local Safway branch for specific information or deck availability.

Offsetting end hooks allow for continuous runs

All drawings on this sheet are for illustrative purposes only. This sheet is intended for general information purposes only. Because of the many variables which affect the performance of the product line, some of the information in this brochure may not apply. For specific applications, contact Safway.

NOTE: All scaffolds shall be erected, modified and dismantled only under the supervision of a Competent Person. Erection, use, maintenance and disassembly must conform to current manufacturer's instructions as well as all federal, state, provincial and local regulations. Copies of complete Safety Guidelines for these and other products are available from Safway without charge.
