

**Experienced scaffold solutions
and services for your industry.**

SAFWAY®

Put our experience to work for you. Project management and scaffolding expertise for industrial applications.

With a tight focus on your industry's specialized needs, we are equipped to handle your toughest scaffolding projects and tightest turnarounds.

Safway Services' involvement with a variety of industrial jobsites means you'll have our access knowledge and experience on your side to help you determine what will work best for your project.

Whether you need scaffold support for plant maintenance or project management to meet FCC turnarounds, Safway is equipped to handle your most challenging industrial projects.

Longevity in the Industry

Strategically placed branch locations and regional distribution centers throughout North America provide immediate access to the largest scaffold inventory in the industry.

Paired with a dedicated, nationwide labor force and the largest in-house engineering department in the industry, and Safway has been able to make sizeable commitments to large projects since 1936.

The Right Scaffolding for the Industry

With several different scaffolding systems and a wide range of experience, Safway provides the knowledge and service necessary for your specific industry.

- Petrochemical – Customized solutions for refineries and chemical processing facilities with continuous quality across projects. Our experience includes maintenance, shutdowns and turnarounds.
- Power – Experienced and ready to mobilize for seasonal or unscheduled outages. Modular or suspended staging and electric hoists provide access through boiler openings. Jig stands and other project solutions available.
- Customized solutions also available for offshore access, shipbuilding, food & beverage, pulp & paper, and alternative fuel industries.

The Right Scaffolding for the Job

Safway provides all the equipment you need to get the project completed on-time and on budget.

- **Systems™** – features patented easy-to-install node-point connections for safety and security. Fast erection and dismantling reduces labor costs and downtime. Most widely used modular scaffold in North America.
- **Sectional** – specifically designed and produced for durable, safe and efficient use.
- **Motorized products** – the most complete line of suspended scaffold products, ground-based hoists and lifts, rigging, and accessories. Our modular suspended systems offer 15°, 30°, 45°, 60° and 90° angles as well as 360° platforms.
- **Tube & Clamp** – installs quickly and connects 360° in any location to custom-fit virtually any structure inside and out.
- **QuikDeck™ Suspended Access System** – modular platform system assembled from just a few basic components. Can be configured to virtually any size and shape. Specifically engineered to reduce labor costs.
- **Rosette Modular / SafLock™ System** (Canada only) – all components are engineered to lock securely "all around" into the rosette. No loose fittings such as nuts, bolts or clamps, saving on labor costs. Each rosette can take up to eight connections.
- **SafAscent™ Wind Turbine Platform** – 6' 6" modular platform designed for safe, external wind turbine access.

Only the best scaffolding equipment passes Safway's quality assurance program to ensure that it is safety certified and meets our standard of excellence.

Project Satisfaction

Safway has a team of designers and engineers focused on finding solutions to even the most complex scaffold project. From application design to estimating, our management teams utilize CAD and a specialized group of programs to help identify and address design problems with minimal delay.

SafScaf – an estimating software linked directly to AutoCAD® – provides the most accurate estimate of the required equipment, labor, and money.

Our unequalled concern for product quality and safety extends into application as well. Pre-job conferences define support capabilities, execution plans and orientation procedures to help ensure a smooth work flow.

Through our online inventory system, equipment can be located, requested, and shipped from anywhere in our branch network.

Once equipment is allocated to your jobsite, **Safway Tracking System** – our proprietary scaffold rental inventory software – is the efficient, effective way to manage scaffold inventory, product utilization, labor hours and costs, giving you maximum control with minimum effort. This program also can provide comprehensive daily and weekly

reports to help you analyze productivity on any of your ongoing jobs.

Safway also offers site safety representatives dedicated to the safe success of your project. As an expert in safety, health and environmental policies, your representative can assist field management with onsite safety programs and ensure compliance with site safety and governmental regulations.

Training University

Safety comes first. All Safway training, safety seminars and literature materials are designed in compliance with current OSHA, Cal/OSHA and OH&S regulations.

Created in 1994 with just one class – the Erector Training Course – the Safway Training University has grown to include several in-depth safety seminars and multiple training support materials including erection videos, training CD-ROMs, and informational literature.

More than 35,000 employees, customers and even competitors have been trained by Safway's group of scaffold specialists.

The trademarks of our Training University are comprehensive jobsite, classroom and web-based training programs taught by industry experts. Combined with advanced Erector Training Programs and the most complete line of training videos in the industry, Safway believes in behavior-based safety training to minimize risk and keep safety in the forefront.

Since 1936, Safway® scaffold has been the industry standard. From Systems™ to Sectional, Tube & Clamp to SafMax®, Motorized access to QuikDeck™, Safway has a full line of products designed for any project.
