Vertical Access Solutions

Start your job on the right track.

This page & facing page
01 & 07: Mast climbers
02: Guided material hoists
03 & 05: Personnel hoists
04, 06 & 08: Transport platforms

Transporting crews and material around your jobsite can be a heavy task. Let our products do the lifting for you.

Complete turnkey service

Your project demands leave enough for you to worry about. Let us help get your workers and materials to your job.

From start to finish, Safway Services sales representatives are at your disposal during all project phases to provide you with complete turnkey service.

Our knowledgeable staff can work with you to help:

- Obtain all necessary drawings and site information
- Communicate with local authorities on regulation and permitting issues
- Ensure you have the right machine for the job
- Transport machine to the jobsite and install it in a timely manner
- Dismantle and remove the machine at job's end

We have the resources to help organize your installation, training and support needs. Installation for most jobs can be completed in less than a week. Machines are transported to your site from one of our regional distribution centers by our personnel or one of our authorized carriers.

The right hoist for your job

We understand that every jobsite is different, and we want you to have a variety of options.

Mast climbers, transport platforms, personnel hoists and material hoists run on rigid masts that are tied into the structure. Safe, easy-to-operate units help move your crews and materials.

Mast climbers

- Provide several platform configurations
- Puts crews and materials at optimum working height
- Are most useful for building façade work as high as 500'

05

06

07

08

Transport platforms

- Variety of platform configurations
- Enables the movement of crews and material from the platform to the building
- Lifting speed of 40' per minute
- Wide-opening gates ease the handling of large, heavy material

Personnel hoists

- Quickly move crews and material to all levels of a high-rise structure
- Lifting speed of 175' per minute
- Can transport 6,000 lbs. of material or 30 personnel with a single car
- Dual car capability on one fixed mast doubles the capacity
- Designed for high-rise structures

Material hoists

- Pendant-controlled to move material only to all structural levels
- Lifting speed of 80' per minute
- Variety of platform configurations
- Ideal for subcontractors on large job sites

Nationwide support

With strategically placed branch locations throughout North America, you'll receive the industry knowledge of an access company that has been in business since 1936.

You'll also have the expertise of the nation's largest, in-house Engineering Department at your disposal during all project phases.

Safway engineers use state-of-the-art technologies, including 3-D AutoCAD drafting, to custom-design your project's solutions.

Branches are equipped to assist you with complete installation and dismantling services. Safety and training personnel help promote safe work practices and can provide you with onsite safety solutions.

Combined with years of industry knowledge, our extensive list of educational programs helps you put safety first on your jobsite.
