

Specialized scaffolding and services for the petrochemical industry.

Access to your work is a critical component to your success.

Tight deadlines. Access challenges. Safway is prepared to handle the unique access challenges you face in the petrochemical industry.

Fast Response for On-time, On-budget Completion

Whether it's for a scheduled turnaround, emergency work or routine maintenance, count on Safway Services to provide you with world-class performance to get the job done.

Equipment needs are easily met by Safway's network of branch locations and regional distribution centers throughout North America.

Crews are locally based, enabling quick response to your emergency projects. Ample inventory can be staged onsite in forklift racks so it's ready when you are.

Scaffold Tailored to Fit Your Needs

Conceived by Safway, our versatile, patented Systems™ Scaffold allows connection of horizontals 360° around the post. Fast erection and dismantling can help reduce your labor costs and reduce your worker's exposure to hazards.

Systems™ also erects quickly around vessels, tanks and storage systems, allowing work to progress at any level. Knee-out brackets allow the diameter of a scaffold assembly to be increased or decreased as needed.

Custom Designs for Individual Applications

With equipment designed for the petrochemical industry, Safway can meet your scaffolding needs. We have special designs to meet your individual needs from the inside of a regenerator to the top of a flare stack. Or, for truly unique situations, we'll design it to your specifications.

Safway has a long history of providing the foremost engineering assistance with one of the largest staffs of professional engineers and designers to solve your complex scaffold problems.

A full range of services is available from application design and estimating to on-site consultation.

Experienced Labor and Services

Pre-job conferences define support capabilities, execution plans and orientation procedures to help ensure smooth work flow.

Skilled and competent crews run by experienced superintendents are available for scaffold installation and removal 24 hours a day.

Safway engineers utilize AutoCAD® software to plan and adjust scaffold designs for your project. Daily and weekly progress reports help keep your project on time and on budget.

Safway Tracking System:

Real-time Results

The Safway Tracking System is an exclusive scaffold management system that captures and generates real-time data about your project's equipment, labor and productivity.

Use it to monitor your progress and maximize productivity. The program has the power to track scaffolds, labor and usage and provide you with real-time reports.

Whether you're attempting to meet a tight turnaround deadline or complete a complex maintenance project, this web-based scaffold management tool can help:

- Access real-time information
- Increase productivity
- Better manage budgets and schedules
- Maximize inventory utilization
- Control project costs

Safety - Our #1 Objective

Safway offers one of the most advanced training programs, designed to meet OSHA's Competent Person requirement. Our national team of dedicated safety professionals helps ensure safety comes first with behavior-based processes that consistently reinforce safety.

Our goal is to limit your exposure to risk through requiring ongoing training, safe work practices, and OSHA compliance.

Industry Recognition

Our dedication and commitment to safety has been continuously recognized by organizations and our customers throughout the industry who take safety as seriously as we do.

- CITGO Petroleum Corporation
- Marathon Oil Corporation
- National Petrochemical & Refiners Association (NPRA)
- Suncor Energy
- Sunoco, Inc.
- Valero Energy Corporation
- Voluntary Protection Program (VPP) "Star" Status

Since 1936, Safway® scaffold has been the industry standard. From Systems™ to Sectional, Tube & Clamp to SafMax®, Motorized access to QuikDeck™, Safway has a full line of products designed for any project.
